SUMMARY

I'm a self-taught AI Engineer with a keen eye for product design. I passionately bridge the gap between complex machine learning algorithms and intuitive user experiences. My goal is to develop high-impact AI solutions from computer vision to LLMs that are not only technically powerful but also accessible and user-centric.

SKILLS

- **Languages:** Python, SQL.
- **Frameworks & Libraries:** LangChain, LangGraph, Scikit-learn, Seaborn, Tableau, Pandas, Numpy, Tensorflow, Keras, Pytorch & OpenCV, XGBoost.
- **Core Competencies:** Generative AI, RAG, AI Agents, Machine Learning, Deep Learning, NLP, Data Analysis.
- **Tools & Clouds:** Google Cloud Platform (GCP), Google Looker Studio, Git, GitHub, Docker.
- **IDEs:** VS Code, Jupyter Notebook, Google Colab, Spyder.

PROJECTS

PNEUMONIA DETECTOR FROM X-RAYS

Python, TensorFlow/Keras, CNN, Streamlit, Docker, GCP.

- Designed and trained a **Convolutional Neural Network (CNN)** on the Chest X-Ray Images (Pneumonia) dataset, achieving high accuracy in classifying Normal vs. Pneumonia cases.
- Implemented data augmentation techniques (rescaling, shear, zoom) to prevent overfitting and improve model generalisation.
- **Deployment:** Dockerized the application and deployed it to **Google Cloud Run**, enabling serverless, auto-scaling access.

TELECOM CHURN PREDECTOR

Python, XGBoost, Streamlit, SHAP (Explainable AI), Google Gemini Pro, GCP.

- Developed a high-performance **XGBoost Classifier** to predict churn risk based on tenure, contract type, and monthly charges.
- Integrated **SHAP** to provide real-time interpretability, explaining why a specific customer is at risk.
- Engineered a **GenAI** Feedback Loop using **Google Gemini** that interprets risk factors and drafts personalised retention emails/offers instantly and deployed in **Google Cloud Run** by **Dockerized** the App.

AUTONOMOUS HYBRID RAG AGENT

Python, LangChain, Google Gemini Pro, ChromaDB, Docker, GCP.

- Engineered an autonomous **Agentic RAG** system using **LangGraph**, orchestrating intelligent workflows that toggle between PDF retrieval and **Tavily Web Search**.
- Implemented a self-correcting loop where **Google Gemini** grades document relevance, autonomously triggering web searches to prevent hallucinations.
- Optimised semantic search using **ChromaDB** and **Google GenAI** Embeddings, ensuring precise context retrieval from complex technical datasets, and then deployed in **Google Cloud Run**.

EDUCATION

Bachelor's Degree in Electronics and Communication Engineering
Kongunadu College of Engineering and Technology, Trichy.

2020 - 2024

CERTIFICATION

Prompt Design in Vertex AI Skill Badge

Offered by Google on July-07-2025
